Risk Assessments

Assess and risk-rate all your vendors to make informed decisions and drive efficiencies.

Overview

Assessing risk on your third parties is one of (if not THE) most important exercises in a third-party risk management program. Defining both the inherent and residual risk of third parties guides the vast majority of due diligence and oversight activities.

The maturity, methodology and approaches of an organization's third-party risk management efforts will vary from organization to organization depending largely on the tenure of the program, the size of the organization and the collective risk represented by the volume of vendors under management. Venminder's Risk Assessments Modules were developed to be expandable and adaptable to support your organization's standards and scale with you.

Overall Inherent Risk: Moderately High					
1. Financial Risk				Section Weight: 34%	Total (Weighted) Section Points: 3.00 (3.7%)
Contributors (Inherent): Anna Smith, [redacted], Bob Jones, Franklin Dashwood					
Question	Your Answer	Question Points	Question Weight	Weighted Question Pts	Level
1. Is sensitive data (NPI (non public information), PII (personally identifiable information) being exchanged or retained?)	Yes	5.00	100%	5.00	Inherent Risk: High Answer: High Residual Risk: Low
1a. Does this vendor have a SOC?	Yes		33%		Answer: Good
1b. What is the service provider's control effectiveness based on the results of the SOC Review?	Strong	3.00	33%	-0.99	19.8% mitigated Answer: Good
1c. Have the Complementary User Entity Controls been identified and addressed?	Yes	4.00	35%	-1.32	26.4% mitigated Answer: Strong
Total mitigated points				3.67	
Contributors (Residual): Anna Smith, [redacted], Bob Jones, Franklin Dashwood				Points (Weighted): 1.33 (0.45%)	Residual Risk: Low

Refine vendor risk assessment scores using advanced risk assessment capabilities inside the Venminder Third-Party Risk Management Platform.

Key Benefits

Create consistency and ease through the course of the entire risk assessment

The platform will drive you through steps from selecting and modifying assessment templates to monitoring progress of an assessment and reviewing results to calculate and judge residual risk.

Align the platform to your organization's risk assessment process

Gain more control in a variety of details, such as risk levels, timing, risk thresholds, risk assessment integration into the Vendor Onboarding Module, ability to record inherent and residual risk separately, utilizing mitigating questions to determine residual risk and provide guidance on mitigating control factors and more.

Improve risk assessment quality and visibility

Rather than just looking at answers in an assessment, close gaps by allowing weight on user's responses to show particular importance, easily see if further mitigation needs to be completed on an item and use reports to monitor it all.

Key Features

- ✓ Perform both inherent and residual risk assessments
- ✓ Invite unlimited users to contribute on any risk assessment
- ✓ Invite your internal subject matter experts (for example, CFO) to weigh in on particular sections of risk
- ✓ Utilize templates or create your own
- ✓ Create clear, concise risk rating reports
- ✓ Prevail questions and sections

- ✓ Customize scoring preferences *
- ✓ Elect prevailing contributors *
- ✓ Include both inherent and residual risk questions in your assessments *
- ✓ Ability to control mitigation allowances *
- ✓ Use within the Vendor Onboarding Module *

*Available with the Advanced Risk Assessments only
